

Archaeology is a publication devoted to the field of archaeology that is meant for the general public. The magazine mainly publishes news related to the field, as well as features on important discoveries that have been made by archaeologists in the past. Archaeology Odyssey is known well for publishing news related to archaeology. The magazine keeps readers up to date on new finds in the field, such as the recent unearthing of a Bronze Age city on the southern coast of Cyprus. Also covered are recent studies of human development, like one conducted by researchers at the University of Liverpool that links the development of language to the development of early stone tools. Each issue of Archaeology contains features on important discoveries that have been made by archaeologists in the past. Many of the features in the magazine deal with sites right here in the United States.
