

This early work by Alfred Russel Wallace was originally published in 1870 and we are now republishing it with a brand new introductory biography. Contributions to the Theory of Natural Selection is a series of essays on evolutionary theory, that include Mimicry, and Other Protective Resemblances Among Animals, The Philosophy of Birds Nests, Creation by Law, and more. Alfred Russel Wallace was born on 8th January 1823 in the village of Llanbadoc, in Monmouthshire, Wales. Wallace was inspired by the travelling naturalists of the day and decided to begin his exploration career collecting specimens in the Amazon rainforest. He explored the Rio Negro for four years, making notes on the peoples and languages he encountered as well as the geography, flora, and fauna. While travelling, Wallace refined his thoughts about evolution and in 1858 he outlined his theory of natural selection in an article he sent to Charles Darwin. Wallace made a huge contribution to the natural sciences and he will continue to be remembered as one of the key figures in the development of evolutionary theory.
