

This focuses on models and data that arise from repeated observations of a cross-section of individuals, households or companies. These models have found important applications within business, economics, education, political science and other social science disciplines. The author introduces the foundations of longitudinal and panel data analysis at a level suitable for quantitatively oriented graduate social science students as well as individual researchers. He emphasizes mathematical and statistical fundamentals but also describes substantive applications from across the social sciences, showing the breadth and scope that these models enjoy. The applications are enhanced by real-world data sets and software programs in SAS and Stata.

Growth In Holiness, The Future of Western Development Assistance (Westview Special Studies in Social, Political, and Economic Development), Solve it!: Small Book X6, Aquaponics: Aquaponic Gardening Guide For Beginners, Abraham and Isaac (People of the Bible Series), Threes A Crowd, Revelation, Second Edition (Readings: A New Biblical Commentary (Hardcover)), Creating New Clients: Marketing and Selling Professional Services, NIV for Teens: 365 Devotional Journal,
